

## 4B Watershow Rows

Outdoor valve-controlled water show installation with fixed and movable nozzles, flexible in length, pipeline stretch and height.

### The advantages:

- Short delivery times
- To adjust onto your needs cost-effectively
- Thousands of different pictures because of movable nozzles possible
- Completely flexible design
- Lighting installation with colour changers
- Controlled by DMX consoles

### System:

- High performance pump installation with almost unlimited specification
- Min. water level: 0.5m
- Quick and easy installation because of optimised components
- Also for slightly polluted water because of large nozzle diameters
- Usable also in salt water

### Installation possibilities:

- Basin width and length adjustable, also on pontoons, footbridges or at seaside.
- Pipeline between nozzle row on land and water basin

### Possible effects:

- Fixed nozzles
- Swinging jet 2D separately selectable in 3 positions
- Three-dimensional moving jet separately selectable
- Foam effect nozzles
- Rotation nozzles
