

1A Delta Nozzles

Rectangular water surface

Suitable for small basins like pools. Allows a rectangular projection surface, sparkling from bottom up out of fan-nozzles. Creates very impressive video or laser projections.

KEY FEATURES:

- Outdoor use in Pools and Lakes
- Rectangular format with Delta Nozzles
- Water movement bottom-up
- Widths from 4 m up to unlimited
- Heights of 4 to 16 m possible
- Very well suitable for projection with laser, video, slide, back lights
- Optimal distance for the observer approx. 2,5 x width
- Only rear projection
- More wind-sensitive than a Hydroshield
- Quick and easy installation because of optimised components
- Nozzles can also be connected with hose to the pump
- Water basin does not have to be among the nozzles (also on land)
- Simple maintenance and cleaning (high-grade steel)
- Also available as salt water version
- Big nozzle diameter, suitable also for polluted water
- very compact and low weight
