WATERSHOW.DE

2G WATERGRAPHIC for Exhibitions and Events
Waterscreen that forms letters and signs via bitmap files
Resolution 48 or 96 valves per meter

THE ADVANTAGES:

> 100% of product by watershow.de - Made in Germany
> Self-developed electronic, designed for our system solutions
> Since 2005 Watergraphic as a repetition part
> Since 2008 new, worldwide unique, self cleaning nozzles
> High nozzle resolution of 96 valves/meter
> Low water pressure system = letters fall down slowly, only accelerated by gravitation
> High speed controller with 5ms valve opening/closing time
> Displays with 200-500 lines per second
> Unique control system to start the whole line of nozzles at the same moment
> 100% self-developed software (no windows)
> Low energy consumption
> Every component is easy to change and maintain
> Control via Remote DMX, Artnet, MA-NET
> DMX OUT for 100% syncronous Lightcontrol
> Fast and modular channel installation concept
> High end lights only from the top

2.G WATERGRAPHIC : DIFFERENT POSSIBILITIES

VERSION 2G48 - Normal Resolution:

> As stage background and for writings
> 48 nozzles per meter = 288 pixels per 6 m width
> Solution for screens with a minimum length of 6 m.
> For example behind a stage, car, or as an entry, etc.
> A cost-efficient solution

VERSION 2G+96 - A high resolution solution:

> For more complex writings and logos with maximum contrast
> 96 nozzles per meter = 576 pixels per 6 m width
> Solution for screens up to 4m length.
> For example in a booth, near the public, short distance, many little letters, complex logos, as a TV background, etc.

VERSION COMPACT 2GC- A high resolution solution:

a complete solution with housing and quick install for exhibition and events.
available in 3m and 4m wide and with
Covers in black and in white .

VERSION 2G48 TRUSS:

> Event system for Tour and Stage Applications
> ultra-short setup time
> 48 nozzles per meter
> 760x520er Truss System

> Due to the standardized segmentation it is possible to realize even curves, circles and individual shapes.

OPTIONS:

> Watergraphic Touch-the interactive toy
   painting>posting>viewing
Only two seconds until you see your painting on our
WATERGRAPHIC.
You paint your picture with a unit who understand HTML
and we reproduce your painting as a watergraphic.
Input with every HTML unit

> Watergraphic Webframe:
   our watergraphic touch Web Interface.
Without App, without WLAN
Only over the 4G mobile connection network in a
normal browser, the guest could access the web site,
can paint over the implemented touch panel, send it
to the watergraphic and share it on Facebook with an
Overlay Image...

> 2GDoor Watergraphic Door
ultra-fast sensor system for safe passage.
A special sensor unit defines a range as passage through
the waterscreen.
This happens in both directions and makes a safe
passage through the watergraphic possible.
