We apply our experience and technological equipment professionally and individually in your project.

*WATERSHOW.DE WATERSCREENS
CREATING PLACES OF ATMOSPHERE FOR 20 YEARS*

2A
2AC
2B

WATERCURTAIN/WATERSCREEN FOR EVENTS
WATERSCREEN FOR CEILING INSTALLATION
WATERCURTAIN MODULAR CURVED

20 YEARS STATE OF THE ART. Easy to clean, 400 nozzles/m milled in a hard plastic plate, a high grade stainless steel structure and a big water quantity are the successful features of WATERSHOW.DE'S BESTSELLER.

A high amount of nozzles and water create an impressive waterfall – A BRILLIANT PROJECTION SURFACE WITH HEIGHTS UP TO 30 METER.

For indoor and outdoor use at events, exhibitions or for permanent installation in swimming pools.

2A and 2B are modular, being maintained from above and especially used free-hanging at events. 2AC is being maintained from below and best suitable for indoor ceiling installation.

LARGE AMOUNT OF WATER/EASY TO CLEAN

2G

WATERGRAPHIC – the Original

art meets performance

Dynamic fonts and logos in full contrast made out of water.

FOR DETAILED INFORMATIONS PLEASE TAKE A LOOK INTO OUR 10TH ANNIVERSARY SPECIAL FOLDER WITH OUR UNIQUE SKILLS.

2S

WATERSCREEN STRIPES

large drops and a small basin size

Specially designed for big drops with 48 or 96 Nozzles per meter and an high amount of water.

With our new high power LED we can create an effect like diamond sparkles.

For indoor and outdoor use as decorative element.

2U

FOG PROJECTION SCREEN

DMX Controlled

Fog effects or fog projection. With a worldwide unique height of up to 8 meters. Outstanding control system to simulate simple figures or an opening and closing theatre curtain.

No Dry Ice, no CO₂, no chemical fog – just water!

2^{SPRAY}***SPRAY FOG WALL***

beautyfull, powerfull, log runtime, pure nature.

The water screen produces a transparent spray of water from above, which has a special 3-D optical effect upon the movie projected on it.

DECORATION ELEMENTS AND EFFECTS OF A SPECIAL KIND

Individuality in design and an uncomplicated use make our decoration elements unique and an amusing medium of communication, as mobile element or as permanent installation.

No matter if they are used as back wall of an exhibition booth or as eye-catcher for a product presentation, a fascinating appearance with lasting impression is guaranteed.

2I

WATERSLIDE FOIL

small measurement basin > no splashing water

Water flow between two sheets of plastic arranged in tiles.
Various measurements. Very small basin, no splashing water.
As partition, boundary for trade fair booths or projection surface.

Special designs like freestanding or curved.

2IF

WATERSLIDE FOIL FRAMED

small measurements basin > no splashing water

Between two sheets of plastic arranged in tiles and available in various measurements the water flow runs downwards into a very small basin without splashing. The special design is free standing and in modules of 1990 and 3160 mm width and 2700 or 4000 mm high available.

2IR

WATERSLIDE FOIL *half-curved version*

small measurements basin > no splashing water

Water flow between two sheets of plastic arranged in tiles.
Very small basin, no splashing water.

4.0 m wide and 3.95 m high standard module.
With 3 stainless steel supports.

2IW

FOIL WATERWALL

for wall mounting

One sheet of plastic arranged in tiles the water flow runs downwards
into a very small basin without splashing. Suitable for wall mountings.

2IC

WATERSLIDE FOIL AS COVERING FOR PILLARS

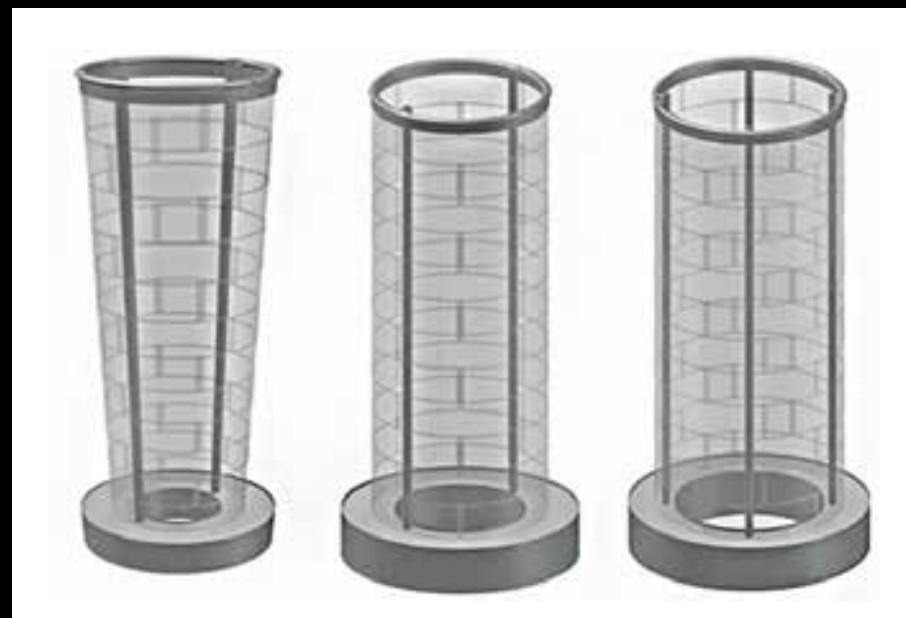

Pillars in exhibition halls are a huge evil. Everybody knows the demand to conceal these to make them invisible. But it's much better to use the pillar to create an interesting highlight.

Our proven splash water free Waterslide Foil is now available as closed cylinder with various diameters. As usual the water flows down between two rounded plastic panels, consisting of individual tiles, into a very small round basin. It's attached to the pillar by clamping fixtures or three scaffold tube supports.

The water support is also placed along the pillar to the top and in most cases concealed with white molleton. With an effective LED lighting from above and below the pillar can be transformed into a small spectacular obelisk.

Standard diameters are 860 / 1000 / 1150 / 1430 mm. The round or square pillar's diameter needs at least to be 300 mm smaller. Each segment of the plastic panel has a size of 450 x 450 mm. The height of the Waterslide can be up to 6 m.

A brilliant instrument for you to make a problem a jewel!

2HE

WATERSLIDE SURFACE

stainless steel, stone or other materials

Leaned against a wall. Up to 6 meter high. Self-supporting and modular constructed. Used with labelling foil or front projection.

2HG

WATERSLIDE GLASS

smooth and clean

Modular, frameless glass surface for top down water flow.
Designed for a height of 2.5 m and a width of 1 m.

Multiple slides put together seamlessly in length.
Also for individual installation.

2HGI

WATERSLIDE INNER GLASS

freestanding stele of stainless steel

High quantity of water runs down along the inside between two sheets of glass. Segments of 1 m width, 2.5 m height and only 0.2 m depth. With LED-RGB-lighting.

Optimal for labelling and as decoration for water resistant exhibits within the water course.

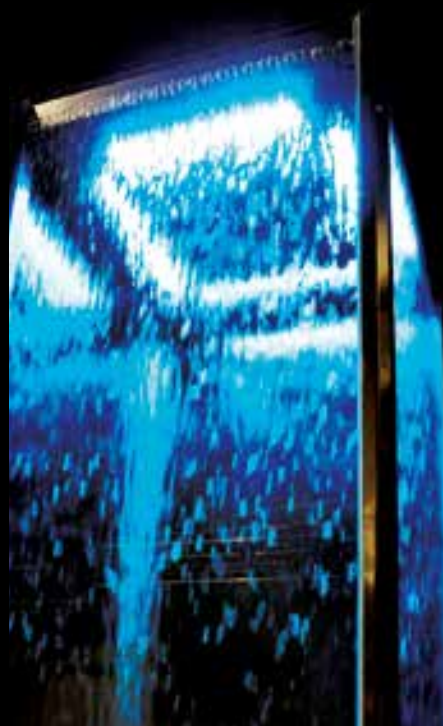

2HGI^{CUBE} *CUBE WATERBOX*

the stele became a square monolith

Spectacular product presentation inside the monolith.
With a 0.95 x 0.95 m base and 2.7 m height.
Integrated LED-RGB-lighting.

Without covering for an individual installation.

2WS *WATERBUBBLE COLUMN DMX*

freestanding waterbubbles column

With vortex pump to create a homogenous dispersion.
RGB 10 Watt LED Light controlled by dip switch or DMX.
Heavy base with counterbalance.

Available with a height of 2.2 m and a diameter of 0.2 m.

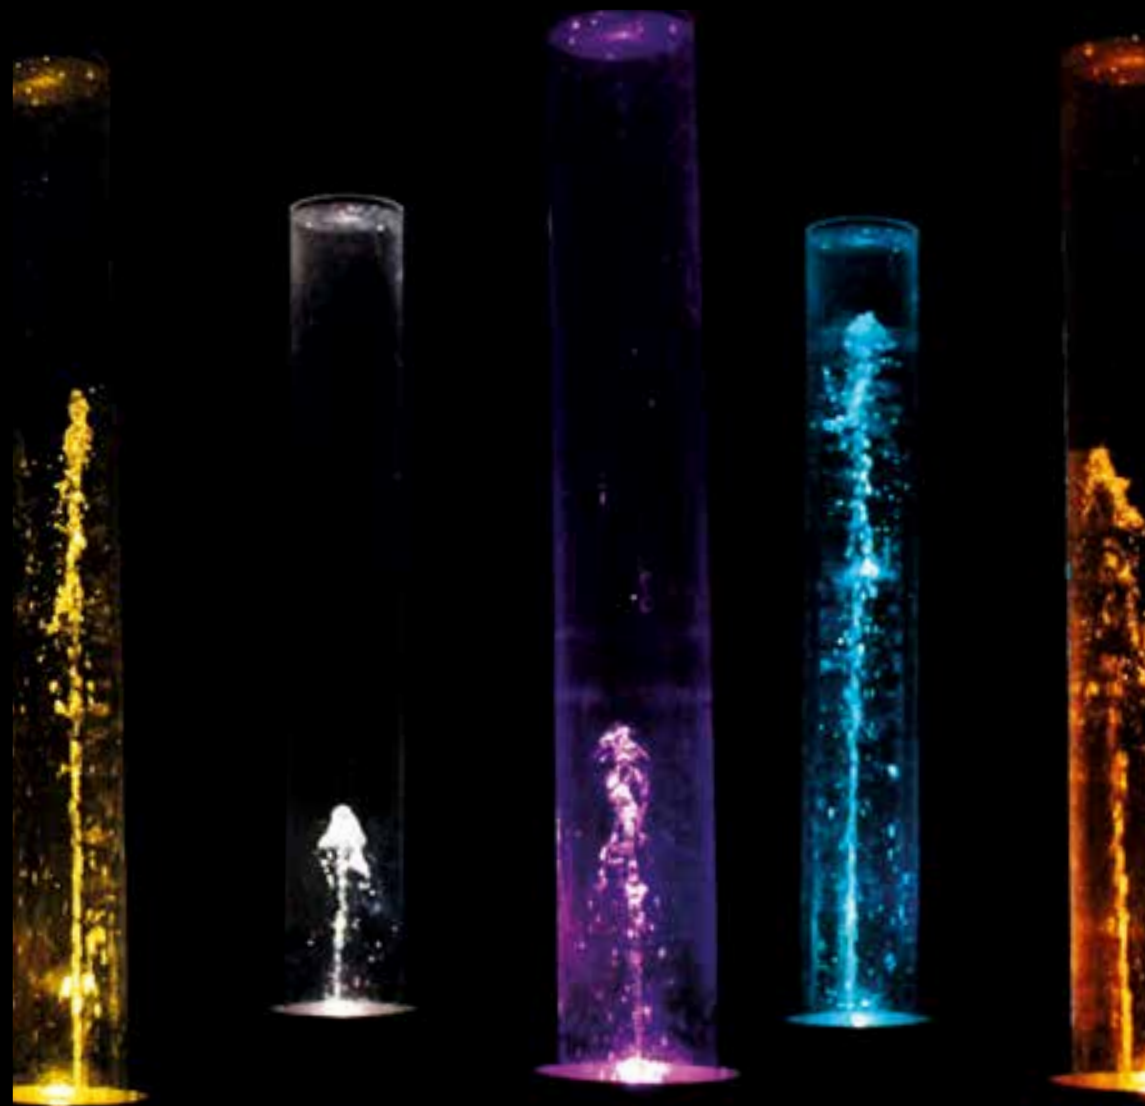

2WF

WATER FOUNTAIN

within a column

Freestanding water fountain column with 9 implemented fountains.
DMX controlled fountain height and integrated RGB 10 Watt LED lighting.

Available with a height of 2.2 m and a diameter of 0.2 m.

2SF

WATERSCREEN STRIPES FRAMED

the best solution in shop-windows

Free falling sparkling diamonds in 96 Nozzles per meter. The best solution behind glass in shop-windows. It's easy to rig or to use with the flexible support structure. The integrated waterlevel monitor protect the pump against dry run.

3R

REVERSE FOUNTAIN

a crown

Impressive, freestanding waterfall circle. 2.5 m high and 0.8 m diameter. As decoration at trade fairs and events.

2BW

BUBBLE WALL

bubble wall panel as decorative element

Creates a smooth and constant flow of bubbles that floats up inside the wall. Can be illuminated in different colors.

Available in different types of dimension and attachments.

3K

FOUNTAIN CIRCLE *WITH DMX CONTROL*

as decoration at trade fairs and events

2.0m diameter, 24 single fountains. Easily adjustable to individual needs and likings. Integrated RGB LED lighting, DMX controlled. Silent run and splashing water prevention.

Pre-programmed shows playable with a DMX player.

3KK

FOUNTAIN CIRCLE SMALL *WITH DMX CONTROL*

as decoration at trade fairs and events

Impressive, freestanding waterfall circle.

As decoration at trade fairs and events.

3M

REFLECTING POOL

Brilliant mirrored in the deep black surface. Not only a dark liner. Watershow.de use additional structured foil to diffuse all incoming light. Metal roof work and plastic sealing's are our family tradition.

In exhibition we use for our secure standard, high quality hot air welded liners, you can pass over by car. Also possible are on place TIG welded stainless steel basins in all measurements.

Options are skid proof rubber mat inserts, white carpet's, led light's, easy adjustable overflow edge's and a lot of craftsmanship.

EPIC

INTERNATIONAL PARTNER

WATERSHOW.DE is represented by a network of experts and affiliates in many parts of the world and so we are at your disposal also for international projects.
